AMELIA YUNISA

085117500284 | ameliayunisaa@gmail.com | https://www.linkedin.com/in/amelynsa | https://amelynsa.github.io/Amel-Portofolio

Bachelor of Applied Science in Informatics Engineering from Universitas Airlangga with internship experience in Software Development, Full-Stack Development, System Implementation, and Functional Testing. Interested in Quality Assurance, System Analysis, and Data Analysis, with practical experience in manual testing, test case creation, bug reporting, API testing, system analysis, database management, and data processing. Familiar with SDLC, STLC, Functional Testing, UAT, SQL, REST APIs, Postman, and Jira. Strong analytical and problem-solving skills with a technical background that supports requirements analysis, data-driven problem solving, and effective collaboration with technical and business teams. Currently developing QA Automation skills through Katalon Studio training.

EXPERIENCE

RSUD Dr. Soetomo - **Surabaya, Indonesia** Dec 2022 - Mar 2023

IT Implementation & Support

- Conducted functional testing across system features to verify functionality and identify issues before system implementation.
- Gathered and analyzed feedback from 10 pulmonary clinic medical staff to identify usability issues and support system improvements.
- Collaborated with development and technical teams to troubleshoot system issues and streamline the implementation process.
- Delivered system training to 10 medical staff over 3 months, supporting successful system adoption in the pulmonary clinic.

Dinas Kesehatan Prov.Jawa Timur - **Surabaya, Indonesia** Mar 2024 - Agt 2024

Web Developer (Frontend Developer)

- Developed and launched a public health website, implementing responsive interfaces, UI components, and backend API integrations using modern web technologies.
- Improved data accuracy, responsive behavior, and website accessibility across multiple devices to provide a consistent user experience.
- Produced technical documentation and trained healthcare professionals, ensuring the system and content aligned with Department of Health requirements.
- Managed the end-to-end deployment and hosting process, successfully bringing the website into public operation.

PT Disty Teknologi Indonesia - **Surabaya, Indonesia** Sept 2024 - Jan 2025

IT Website Developer (Fullstack Developer)

- Developed full-stack web features using Laravel, covering frontend interfaces, backend logic, database operations, and core application functionality.
- Performed systematic testing and debugging to identify technical issues and improve application stability and reliability.
- Worked throughout the software development lifecycle, translating requirements into functional features and delivering assigned tasks within project timelines.

PT. Sentra Vidya Utama (Maganghub) – **Surabaya, Indonesia** Dec 2025 - Jun 2026

Junior Software Engineer

- Contributed to web development and AI automation projects using Laravel, Next.js, TypeScript, Python, PostgreSQL, and MySQL.
- Developed and deployed an AI Agent that automated the collection of 7,000+ job vacancy records using VPS infrastructure and scheduled cron jobs, reducing manual data collection effort.
- Maintained and enhanced career service and tracer study platforms, implementing feature improvements based on Jira tickets and stakeholder requirements.
- Investigated and resolved application bugs while developing feature enhancements, improving system functionality and reliability.
- Developed frontend features for internal administrative systems based on functional requirements and existing system workflows.
- Collaborated through GitHub and Jira while managing application data using PostgreSQL and MySQL.

EDUCATION

Universitas Airlangga - **Surabaya, Indonesia** Aug 2021 – Aug 2025

Bachelor of Applied Informatics Engineering, 3.62/4.00

- **Relevant Coursework**: Algorithm and Data Structure, Database Programming, Object-Oriented Programming, Information System Analysis & Design, Framework-based Web Development, UI/UX Design, Artificial Intelligence, Machine Learning, Quality Assurance

PROGRAMS & TRAINING

Studi Independen – Lintasarta Cloudeka Laskar AI *(Dicoding)* Feb 2025 – Jun 2025

AI Engineer

- Completed 282 hours of industry-oriented training in Artificial Intelligence, Data Science, Machine Learning, and Deep Learning.
- Applied Python and data analysis techniques to process, analyze, and visualize datasets for machine learning applications.
- Learned and applied machine learning workflows, including data preparation, model development, evaluation, and end-to-end system implementation.
- Studied AI fundamentals, data visualization, machine learning, deep learning, and industry-based data science case studies.
- Developed a capstone project for food recipe detection using image recognition, including model evaluation using performance metrics and analysis of classification results.
- Strengthened analytical, problem-solving, time management, and professional communication skills through individual and team-based projects.

QA Engineer Bootcamp — Nusacodes Sept 2026

QA Engineer

- Completed all 6 sessions and assigned QA tasks throughout the program.
- Created and executed manual test cases for Web, Mobile, and API applications.
- Identified and documented bugs through professional bug reports and testing evidence.
- Performed API CRUD testing using Postman and MockAPI, and completed the final QA testing report.

PROJECTS

QA Manual Testing Project — Web, API, and Mobile

Nusacodes QA Engineer Bootcamp

- Created and executed 10 manual test cases across Web (SauceDemo) and Mobile (Notes iOS), with documented test results and evidence.
- Performed functional, Positive/Negative, and exploratory testing, identifying and documenting 2 bugs in SauceDemo using professional Bug Reports.
- Conducted API CRUD testing using Postman and MockAPI through POST, GET, PUT, and DELETE requests, and validated the corresponding responses.
- Completed and submitted the final QA project and testing report covering test cases, test execution, bug findings, and API testing results.

Software Requirements Analysis: Waste Bank Management & Exchange Information System

System Analyst & UI/UX Designer

- Analyzed requirements for a waste bank management information system through stakeholder interviews with the Jambangan District Waste Bank manager.
- Designed the system architecture and requirements using DFD, Use Case Diagrams, and ERD to define business processes, system interactions, and data relationships.
- Developed high-fidelity wireframes and interactive prototypes in Figma based on validated user requirements.
- Collaborated within a 5-member team to align system requirements, UI/UX design, and technical documentation.
- Completed the Software Requirements Specification (SRS) and system design, resulting in the project being recommended for full-scale web development and innovation competitions.

Thriftinc Website Development

Full-stack Programmer

- Developed the backend architecture using the Laravel framework, including the implementation of models, controllers, routing, and core business logic.
- Designed and managed the database using Laravel's Eloquent ORM, establishing complex table relationships and efficient CRUD operations.
- Engineered core e-commerce functionalities, such as user authentication, product management, shopping cart systems, checkout processes, and advanced search features.
- Successfully delivered the platform, which received high recommendations for entry into innovation and development competitions.

Skincare Product Selection Decision Support System (DSS) using AHP and SAW

Bachelor's Thesis in Applied Informatics Engineering

- Processed and analyzed a dataset of 1,258 skincare products to develop a decision support system based on price, product type, brand, benefits, and skin compatibility.
- Applied AHP for criteria weighting and SAW for alternative ranking to generate data-driven skincare product recommendations.
- Validated the decision model through AHP consistency ratio testing, weight validation, and selection verification.

- Developed and evaluated the system using Flask and SQLite, integrating data processing and decision-making functionality.
- Conducted usability testing with 15 respondents, achieving a SUS score of 90.83 (Excellent), demonstrating strong system usability.

Food Recipe Detection based on Image Recognition

AI Engineer

- Developed an image classification solution for food recipe detection using machine learning and deep learning techniques.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-score to measure classification effectiveness.
- Analyzed confusion matrices to identify misclassification patterns and areas requiring model improvement.
- Tested the model against unseen image datasets to evaluate generalization across different food image variations.
- Delivered model evaluation insights to support improvements to the machine learning pipeline and overall AI prototype quality.

ADDITIONAL INFORMATION

- **Interpersonal Skills:** Professional Communication, Team Collaboration, Time Management, Structured Problem Solving.
- **Technical Skills:** Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, UAT, Test Case, Test Scenario, Bug Reporting, Severity & Priority, SDLC, STLC, API Testing, Postman, Jira, Katalon Studio, SQL, REST API, System Testing, Debugging, Basic Programming.
- **Programing Languages:** JavaScript, Python, PHP, SQL.
- **Framework & Tools:**
  - Frontend: React, Next.js.
  - Backend: Node.js, Laravel, Flask.
  - AI/ML: TensorFlow, Keras, Streamlit.
- **Bahasa:** Indonesia, English.
- **Pelatihan dan Sertifikasi:** UI/UX Design Series: Short Class Certification – Issued by MySkill.(sertifikat)
- **Pelatihan dan Sertifikasi:** Software Engineering: Short Class Certification – Issued by MySkill.(sertifikat)
- **Kompetisi:** Participant in the ICT Business Development Category (Kompetisi Mahasiswa Nasional Bidang Teknologi Informasi dan Komunikasi). (sertifikat)
- **Kompetisi:** Participant in the UI/UX Design Competition DevFest 6.0. (sertifikat)
